DETAILED ACTION

Status of Claims

Amendment filed 09/14/2006 is acknowledged. All previous claims are canceled and new claims 42-50 are submitted. Claims 42-50 read on the invention of the originally elected Group IV.

The new claims are directed to method of use of seven particular compounds. As applicant originally elected as species peptides comprising sequence KLVFF, the two peptides addressed in the this Office action are peptides comprising sequences VHHQKLVFFA (i.e. 12-21 fragment or peptide #12) and HHQKLVFFAE (i.e. 13-22 fragment or peptide #13).

Claim Rejections - 35 USC § 112, first paragraph

Claims 42-50 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The new claims, to the extent they read on the elected species are directed to method of inhibiting polymerization of amyloid peptide by administering a therapeutic effective amount of compounds comprising sequences VHHQKLVFFA (i.e. 12-21 fragment or peptide #12) or HHQKLVFFAE (i.e. 13-22 fragment or peptide #13). Specification, at best, discloses that such peptides

Art Unit: 1631

bind A β 1-40 (see Fig. 2A and Example 1); specification does not disclose that said peptides inhibit polymerization of amyloid peptide either *in vitro* or *in vivo*. The only demonstration of inhibit polymerization of amyloid peptide is provided for peptide AcKLVFFNH₂, in Example 3, pages 12-13. This is a new matter rejection.

Art Rejections

In view of the above new matter rejection, art rejection of record over Findeis is withdrawn. The Findeis reference does not teach inhibition of amyloid polymerization by peptides comprising particular sequences VHHQKLVFFA or HHQKLVFFAE as instantly claimed. In fact, to the contrary, the reference teaches that fragments having 13th residue (i.e. the leftmost H residue) fail to inhibit aggregation of amyloid peptide (see col. 57, lines 33-43 and Tab. III)

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1631

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
